

## Heavy-Duty Lathe: 36"x60" to 43"x196"

### DL B

C

Heavy-duty Lathe with large 4" spindle bore provides superior rigidity during roughing and finishing work.

- all gears and shafts made of steel alloy, hardened and ground
- induction-hardened and ground guideways
- headstock runs on taper roller bearings
- practical central location of controls for feeds and thread leads
- handwheel for tailstock adjustments (only on machines with a center width above 120")
- separate rapid feed motor for X axis and Z axis
- Joystick control for X and Z feeds is mounted directly to support
- support is specially designed for high cutting forces
- central lubrication system
- high intrinsic weight ensures minimum vibration
- powerful 15 Hp motor for high cutting capacity
- diametric, inch, module and metric threads
- overload slip clutch enclosed in apron
- large spindle bore
- hardened guideways
- heavily ribbed bed

Includes completely assembled 3-axis position indicator
